# TIGR**PX** for Better Outcomes
NEXT-GENERATION INTERACTIVE PATIENT ENGAGEMENT SOLUTION

avidex

Developed from decades of evidence-based research and working with nearly 500 hospitals, Avidex transforms the way patients are educated, informed and entertained--giving them the tools they want and need to manage their own care. With patient-specific education plans, communication tools, patient request and service recovery capabilities, system integrations, and entertainment features, the patient experience has never been more engaging. **TigrPX** enables hospitals to automate workflows and standardize education to drive quality, safety, satisfaction, and service excellence. The **PVS (Patient Video Solution)** option also creates a virtual care environment. Patients can video conference with clinicians or family during their hospital stay for greater engagement.

COMMUNICATE WITH CARE
A friendly, adaptive user experience to better engage, educate, and empower patients and family in the recovery process.

KNOWLEDGE LEADS TO BETTER OUTCOMES
Engage patients and family with on-demand access to patient-specific care plans, health and wellness education, discharge instructions, and important hospital information.

GENTLE INTERACTIVE REMINDERS
Automated system prompts encourage participation and engagement to empower, educate, and motivate patients to be more involved with their care plans.

Engage Patients on a NEW Level With Tigr**PX**

Dramatically enhance and streamline the provider-patient dynamic. With access to analytical data, clinical teams are able to view and track education, compliance, patient requests, and more. Available for deployment on in-room patient televisions and/or tablets, our innovative, intuitive system is cloud-based and easy to implement into your existing network infrastructure.

- Patient Video Solution (PVS)[1] creates HIPAA-compliant virtual care
